Plastic Handled Paint and Varnish Brushes – Bristle

Use these brushes with oil-based paints. The natural flag of the bristle enables it to hold more paint, release it evenly and slowly and provides for smooth distribution. Price-sensitive and durable, these high quality, plastic-handled brushes are perfect for the price-sensitive homeowner or for those who must satisfy high performance demands on tight budgets. Examples include: building maintenance staffs at hospitals, municipalities, universities or office and industrial complexes.

Foam Handled Brushes

Price-sensitive and durable, foam-handled brushes are engineered to deliver high production-rate quality finishes at the lowest cost possible. Use in large surface-area production jobs where roller cover or spray finishes are not an option. Examples include: structural steel work, ship building, tank coatings, etc.

4" No. 537

Name, Type Fill	Use	Size	Thick	Length	Box Qty.	Part No.
No. 537 Wall Polyester	An extra thick, square top tool for fast production with all paints. The light-weight foam handle is easy on the hand and makes large surface-area painting a snap. Use where coatings must be well-worked into the substrate or where a smooth, even finish is preferred.	3"	7/8"	2-1/2"	6	10108
		4"	7/8"	3"	6	10110

Name, Type Fill	Use	Size	Thick	Length	Box Qty.	Part No.
